

ERP IMPLEMENTATION STATISTICS

1

SUCCESSFUL ERP IMPLEMENTATIONS:

67% of respondents in a survey said that they either had successful or very successful ERP implementations.

REASONS FOR SUCCESSFUL IMPLEMENTATION:

Well executed change management programs, support from upper management, and due diligence were the three critical reasons for successful implementation.

2

3

WHAT WENT WRONG DURING IMPLEMENTATION

12% of survey respondents quoted substandard software quality hindered the implementation process.

MAJOR IMPEDIMENTS DURING IMPLEMENTATION:

Inadequate business process reengineering and insufficient testing were quoted as the two significant impediments.

4

5

AFTER-EFFECTS OF ERP IMPLEMENTATION:

49% of survey respondents accepted that ERP implementation had a favorable outcome for their business. On the contrary, only 5% believed that ERP implementation didn't improve their business processes.

IMPLEMENTATION TIME:

A survey revealed that the fastest ERP implementation happened in mid-size companies — USD 100 million to USD 250 million — that took 6.6 months. On the contrary, big companies, those over USD 25 billion in

6

7

IMPLEMENTATION SPEED:

Survey reveals that 13% of companies went live before the allotted time, 49% in the assigned time, 27% breached the designated time by a few days, while 11% far exceeded the set time.

8

REASON FOR GOING OVER BUDGET:

Expansion of the initial project goals was the primary reason quoted for going over budget.
